

ACCOMMODATION AND ACCESSIBILITY FOR EVERYONE IS A PRIORITY.

ABOUT THE AMERICAN WITH DISABILITIES ACT (ADA)

The ADA is one of America's most comprehensive pieces of civil rights legislation that prohibits discrimination and guarantees that people with disabilities have the same opportunities as everyone else to participate in the mainstream of American life – to enjoy employment opportunities, to purchase goods and services, and to participate in state and local government programs and services. It gives federal civil rights protections to individuals with disabilities similar to those provided to individuals on the basis of race, color, sex, national origin, age, and religion. It guarantees equal opportunity for individuals with disabilities in public accommodations, employment, transportation, state and local government services, and telecommunications.

Many business facilities were built with features that do not accommodate people with disabilities, including people who use wheelchairs. This lack of accessibility makes it impossible for many people with disabilities to take part in everyday activities such as going to work, eating in a restaurant, or shopping in a store. The ADA recognizes that, for people with disabilities to participate in the everyday activities in their communities, they need to have access to employment as well as to the goods and services provided by businesses.
